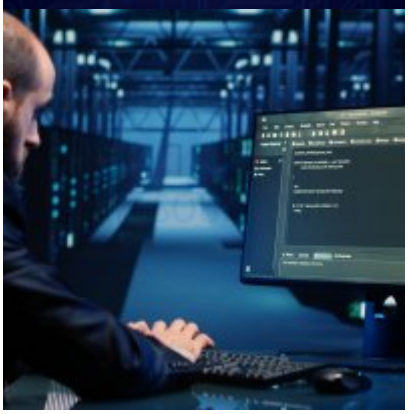
IT-Security Check 1

IT-Security Check



Review of IT Security on a Performance Basis

Do you need an IT security check?
Imagine if a single security incident brought your entire business to a standstill. How would you deal with the financial impact, the loss of customer confidence and your reputation? Do you have detailed contingency plans in place? Can you be sure that your employees always follow the latest security guidelines? This is exactly where we come in as IT security consultants!

According to the BSI, cyber security incidents in Germany have increased at an alarming rate. In 2023, over 14 million malware infections were registered at companies - more than double the previous year's figure. Smaller companies are particularly vulnerable as they are often less well equipped for IT security.

Our experienced team will analyze your existing security measures, identify vulnerabilities and develop a comprehensive strategy specifically tailored to your business needs. We use innovative technologies, training for your employees and continuous monitoring to ensure your business is protected around the clock.

Procedure of an IT Security Check
Our experts have extensive specialist knowledge and experience in the field of IT security and help companies and authorities to assess the current IT security situation comprehensively and competently.

1)
In a free and non-binding consultation, we clarify the framework conditions and objectives of an IT security check. Our experts will help you determine the appropriate scope of the IT security check and provide an initial assessment of the security situation.

2)
We plan the implementation of the IT security check based on your requirements.

3)
Our experienced technical team will take a close look at your IT infrastructure and communication networks and uncover potential security risks. We go the extra mile to ensure you receive a comprehensive risk assessment to leading industry standards - leaving no stone unturned in our search for vulnerabilities.

4)
Once our checks and analyses have been completed, you will receive an IT security check report. This contains details of the findings, such as vulnerabilities and security risks.

We provide recommendations for measures that should be implemented to increase IT security. These are prioritized depending on their criticality.

5)
Our team of experts offers you a complete package for information security - from conception to implementation on a success basis.
We do not leave you on your own. If you wish, we can support you in eliminating the findings and implementing the recommended measures.
--

Do you want to carry out an IT security check?

Planning and implementation of IT security checks for companies and authorities of all sizes - we operate nationwide and are happy to support you. Make a non-binding inquiry now.
